Set only 10km from Camperdown is this 82.8 acre block of land. The property consists of predominately arable elevated volcanic soil and is split into three large paddocks and two smaller holding paddocks. Located on the property is a well set up set of cattle yards with a crush and a hay shed/machinery shed. Fencing is good, pastures have been well fertilized and there are several established shelter plantations throughout the property. The property is connected to town water. Power is not connected but is available. Inspection by appointment only.
