This enchanting mid-century home sits on 1480m² (approx.) of land, featuring 4 bedrooms, multiple living zones, high ceilings, built-in art deco style cornices, windows, and fireplaces. Take advantage of dual street frontage offering plenty of space to grow and the potential to add your own finishing touches. The ground floor consists of 3 generous bedrooms, recently renovated kitchen, formal lounge, dining room and games room; some of which take in southerly views across the city toward Lady Bay. The lower level boasts the 4th bedroom, office space, laundry, large alfresco entertaining area and, internal access from the garage. With cafes, restaurants, and retail just a few blocks away, it provides a rare occurrence to purchase first-class architecture on a large block in a central tightly held address.
