Its Addressed: This exceptional property boasts a unique and custom-built architectural design, created by Eco Architect John Cameron, and features breathtaking 360-degree views of the mountains and ocean. Nestled on a prestigious ridge in Kingsholme, the property sits on a generous 3-acre block, with a stunning reserve as its backdrop. The home has been strategically designed for optimal orientation, allowing natural breezeways in summer and warmth in winter. With over 527m² of eco-designed living space spread over three levels, this home offers a unique layout and bespoke features, including a front door made from recycled heritage timber from the old stand at The Gabba. The living areas are spacious and open-plan, featuring polished concrete flooring throughout and a high ceiling of 3.9m in the main area and 2.9m in the bedrooms. The kitchen boasts a 900mm gas oven and an industrial-sized cold room, perfect for food storage. The living room features a built-in bar and a fireplace, adding to the warmth and ambiance of the space. The property also includes a study on the lower floor and a kid's retreat with external access. The large master bedroom is a standout feature of the home, with a balcony and a walk-in robe the size of a room. The ensuite boasts a double shower and vanity, adding to the luxurious feel of the space. The additional four bedrooms feature built-in cupboards, fans, and stunning views. The outdoor entertaining area is a standout feature of the property, featuring a pizza oven and a built-in BBQ, overlooking the Northern Gold Coast lights out to Moreton Bay. The area opens up with bifold stack doors from the living area, making it perfect for entertaining. The property also includes a grand inground saltwater pool, a built-in pool cabana, and 360-degree views to Stradbroke Island. The property borders the Stage Coach Reserve and is incredibly private, with only one neighbour at a distance. Other standout features of the property include two huge sheds, one measuring 15m by 7.5m with 3 phase power and 5kw solar, and another measuring 12m by 6m. The property also includes 12,500L of water tanks (4), a bore, and a sealed driveway. Built-in 2000, on the old Stage Coach trail used to deliver mail back in the 1800-1900s, this property is an exceptional offering, not to be missed.
