**\$585,000**

From the street, you may be forgiven for thinking this house is no more than a neat and tidy family home on a good street. You couldn't be more wrong. This home is all about living. A place where friends and family will gather and enjoy good times. There are five living spaces all up if you count the two main outdoor spaces. Which you should. The main deck is 8mx 8m under roof with drop-down block-out blinds all around and a good view of the river, which means you will be getting the cool river breeze. It has a family-sized Matador BBQ sitting in a built-in kitchen with a sink and storage. This deck overlooks the pool with its cascading water feature and cool LED lighting. This is where families will gather to celebrate important milestones and family occasions. The pool deck is more sophisticated and is the cocktail lounge of the house, with chilled still and sparkling water plumbed in. It features another built-in kitchen, this one with stone benchtops and a sink along with a top-of-the-range Rhino outdoor fridge to keep the wine and beer cold. It is also under the roof and with an automatic awning that rolls out of the pool for shade if needed, with a built-in wind sensor. Add the private fire pit area, the orchard, and the rainwater tank and you have the outdoors covered. Inside the kitchen has been updated complete with a Fischer and Paykel 900 ml stainless gas/electric oven which is the centerpiece of the kitchen. It flows seamlessly from here to the pool deck through Bi-fold doors that maximize that indoor-outdoor feel. All bedrooms are large with built-ins and the house is fully air-conditioned, but don't worry about the running cost... the 6.5 KW solar system will take care of that and more. The main bathroom is opulent with an open shower room and freestanding claw foot tub. The second bathroom is downstairs and is adjacent to the large laundry with built-in cabinetry and a large walk-in linen room. There are also two more living spaces down here along with internal access from the daily driver garage with extra storage. The toys are not forgotten, with an additional high-roof double garage, and hardstand with shade cover for an additional two more vehicles. Motorbikes, camper trailers, etc will be locked away safe and sound. There is also a generator plug hardwired into the house. This home has it all, but most of all it has five-star livability.
