This property offers a rare opportunity to secure a future building allotment for your new home in an attractive central Sale location. The block has approximate measurements of 15m x 50m (763m²) giving many options considering the depth available. The orientation will allow you to maximise the northerly aspect that will provide natural light throughout the year. The current residence is in poor condition and the block will need to be cleared by the new buyer as the property is selling "as you see it" on your inspection.
