The combination of the traditional Queenslander design and modern amenities creates a harmonious living space that embraces the charm of the past while accommodating the needs of the present. Comprising of a formal entry foyer that leads you to 3 generous sized bedrooms, living area and on to the open modern kitchen with pantry. The lovely pine timber floors and ornate details like fretwork and high ceilings bring a sense of warmth and elegance to the interiors, creating a cozy and inviting atmosphere. The inclusion of 5kW solar power is a commendable step towards sustainability, contributing to reduced energy consumption and environmental impact. The versatility of the two sleepouts allows for flexibility in using the space, accommodating different lifestyle needs such as home offices, hobby areas, or guest rooms. The fully fenced yard with side access ensures privacy and safety for children and pets to enjoy outdoor activities. The covered area underneath the house serves as a multi-functional space for laundry, parking, storage, and even housing visitors in the self-contained area. A prime location within walking distance to shops, town amenities, and schools offers the convenience and accessibility that families and individuals desire.
