\$560,000

Located on the popular South side this quality built brick home has undergone a tasteful internal renovation and update. There is a sunny entrance hall adjacent to the bright main lounge room, a family area off the modern kitchen, zoned master bedroom to the front with another 2 kids bedrooms to the rear PLUS either a fourth bedroom or study/office centrally located. The family bathroom has also been re-done and there is a large laundry that could easily be converted to another bathroom. Outside there is a HUGE garage/workshop in the rear yard with good/clear lane access for the tradie which can also be reached from the front driveway. The land is suitable for a two lot subdivision (STCA) as there is ample room to the side of the dwelling. The home is currently vacant and available for immediate settlement if required.
