\$560,000

Positioned just 12kms North of Foster on approximately 5 acres this three bedroom home with Corner Inlet Views is a great getaway or permanent residence. The lower part of the property is secluded with a tree fern canopy and an intermittent waterfall which attracts wildlife such as wombats, wallabies, lyrebirds as well as many other bird species. The parrots are spectacular and come to feed right on the surrounding deck in the morning and at dusk. Features of the home include a large living area with direct access to the veranda overlooking the views, a central kitchen / dining area with gas cooking, laminate kitchen with ample storage and bench space. The home also has three bedrooms, master off the lounge is large in size, with BIR's and has access to the veranda as well as a window to an atrium / patio area. Ability to add an ensuite (STCA). The remaining 2 bedrooms are at the kitchen end of the house, 1 with BIR's and both with carpet and large windows. A central bathroom with vanity and shower over bath and a separate toilet. The laundry is under roof line and contains an additional shower. Externally the home has a rear decked veranda with views of your rear garden, bush land and the Corner Inlet. A concrete front veranda, single carport attached to the home and a garden shed and tool shed. Cleared paddock to the front of the house, has 2 large water tanks. The property is surrounded by and a majority of the 5 acres is natural bush providing a peaceful setting and a corridor for the wildlife. Well worth an inspection.
