Like the iconic mews of London, Lori's homes are tucked away behind grand residences in one of Melbourne's most exclusive pockets. Each home offers its own secure garage – a flexible space that can accommodate and charge two cars or launch a journey of a different kind. A business, artwork or workouts: there's a world of possibility waiting here, ready to get started. Every detail of Lori is crafted to optimise today – and tomorrow. Oak floors, Polytec surfaces, terrazzo and double glazing as standard prioritise comfort and durability. Layouts maximise passive solar orientation and cross-flow ventilation, with iconic breeze blocks providing airflow, privacy – plus a dash of modernist flair. At Lori, design is about time, not trends. These homes are built to last beautifully through decades and generations. Every space is usable and smart, each square metre meticulously considered.
