The absolute pick of positions overlooking Tower Hill reserve, with stunning views capturing gloriously the volcanic crater lake as well as the southern ocean. Open up your imagination with this quaint little old weatherboard bedroom cottage set on the 524 square metre block, or make it your blank canvas and create your dream. This is truly a unique opportunity. Tower Hill Wildlife Reserve sits in a large volcanic crater. It is one of Victoria's most fascinating and significant geological formations. Volcanic cone-shaped hills rise from the lakes. Tower Hill is home to some of Australia's best loved wildlife. Emus, kangaroos, koalas, swans, ducks and blue wrens all live inside this magnificent dormant volcano near the Great Ocean Road. Walk across wetlands, craters and bushland and learn how the park was exploited by early settlers before being restored by volunteers. Note: internal photos have been digitally decluttered.
