Renowned throughout the district for its consistent quality soils, solid effective infrastructure and long history of first class management practises "Myora" is presented to the market after 25 years held by one family. Buyers will be impressed by the healthy pasture, excellent fencing and laneway system, clean, wide open paddocks with appropriate shelter belts and numerous dams throughout. Myora is well suited to either adding on to a current holding or farming as a stand alone unit with a good home and full set of infrastructure providing for both sheep and cattle. It is rare for a property of this quality to be available in this location, call today to arrange your private inspection of Myora.
