\$680,000 - \$730,000

Timeless modern never goes out of style, nor does happiness, and you'll find both in this must-have townhouse. The most refined abode awaits you, a place where you can enter and leave the outside world behind. Soak away the day in the tub and relax in comfort with additional heating and cooling throughout the home. With an immaculate presentation, there's nothing left to do but enjoy. You'll also appreciate the home's innovative design and seamless flow. The downstairs living areas feature a spacious lounge room with street views, as well as an open plan kitchen and dining area ideal for entertaining. The laundry and powder room are adjacent, and the double car garage allows you to unload groceries right into the kitchen. If you want to master your culinary skills, there's plenty of room on the long island bench or barbeque in the adjoining outdoor alfresco area, which opens up via large sliding doors and provides an abundance of natural light into the home. The downstairs area also boasts durable floors, which provide a smooth transition between the indoor and outdoor spaces. When it's time to unwind, strolling up the carpeted stairs will immediately feel soothing and transport you to your upper sanctuary of peace and relaxation. Beautiful carpet flooring covers all three generously proportioned bedrooms with BIRs, and large windows take advantage of the surrounding views. This home could easily accommodate a young family. The Master includes its own connected ensuite, and down the hall is another full-sized bathroom fitted with double basin counters, plenty of storage and a bath with overhead shower function. Everything you need to feel right at home is simply waiting to be discovered, so come and inspect today.
