Builder Appointed | Construction Commencing June 2023
The Aitken building features a selection of one and two bedroom creek fronting homes and apartments, with living and outdoor terraces oriented towards views to Merri Creek and across to the city. With between three and six apartments per floor, most apartments are located on corners, maximising natural light and cross ventilation. Excellent south west orientation designed to provide an inspiring environment night and day. Benefiting from its corner position the balcony takes in leafy views onto Merri Creek and across to the city. Featuring a dedicated rooftop garden enjoying sweeping views of the nearby creek, tree tops and the city beyond, with comfortable spaces fitted with shade structures and a garden experience interspersed with pockets of seating and outdoor dining. Each of the four interior schemes at Merri is an expression of materiality and craft. Where considered design is accentuated by great detail. The materials of the schemes, while similar, have a slightly different approach. Maintaining the tactile quality of exposed concrete throughout, each scheme maximises the generosity of space within each dwelling. Every element is considered, with nothing feeling out of place.
