## **FOR SALE**

Good Homes on Flinders Island are extremely hard to find, and a four bedroom home opposite the beach is almost impossible - until now. Currently running as very successful AirBnb, it is being sold on a walk in walk out basis, making it ideal for those wanting a permanent home, or investors wanting to grab a holiday home with income or great investment property for seasonal workers or the medical staff who travel to the island so frequently. Four bedrooms, one and a half bathrooms (separate shower room plus separate bathroom), it can accomodate eight guests easily. It has a big solar system installed power bills are almost non existant. Call today for full details on this terrific opportunity.
