Seldom does a large acreage become available at St Helens. An opportunity arises to acquire this lovely parcel of land on the banks of the Georges River. The undulating land has an area of 58.03 hectares (143 acres). There are some cleared areas close to the river allowing for picnicking and fishing. Scope for development (STCA). For the fossicker there is an old mining site and water race. Several gravel roads allow for easy access over the land. Inspection of the property is by appointment only.
