This home is straight from a magazine. On point and very trendy. the recent renovation is up there with the best. Built in 1984, this well constructed brick veneer home has an impressive facade that dominates the street. Yet don't be fooled, once you step inside, you are greeted with light filled living zones, impressive high cathedral ceilings and a touch of classiness and clever features rare to see that are perfectly displayed in every section of the home. A sunken lounge with lux fireplace and formal dining area greets you as you enter the home with stunning new floor coverings and large open windows delivering all the natural light. The home has been fully renovated with impressive new kitchen, stone benches, top quality appliances and clever colour tones. There has been no stone unturned with both bathrooms and laundry having been completely renovated, with the stylish theme carrying through the entire home. Internally, the home has features galore and has a sense of warmth yet is so modern in its design. For those looking to cool off during the Mildura heat, the home features a large inground Cookes pool plus large pitched entertaining area. The rear yard is low maintenance and given its proximity to town, its perfect for those needing a simpler lifestyle. Double garage UMR, 7.8 Solar System, auto sprinklers and a home that has so much to say, an inspection will tell you the rest.
