This one's got to be close to being the perfect building block - situated on the high side of the street, is gently undulating with all services available (town, water sewerage, sealed roads, channel, kerbing & footpaths). Further, there are protective covenants to ensure the quality of housing within the estate is of a high standard. And you won't complain about the ocean view and countryside vista from this elevated position. Possibly the cheapest allotment in the subdivision which is why you should act quickly.
