\$750 pw

This brand new home in Newport sounds like a dream for anyone looking for modern conveniences and comfort in their living space! With its 4 built-in bedrooms, this house is designed to accommodate both privacy and community living. The air-conditioned master bedroom is a luxurious retreat, featuring an ensuite, a walk-in robe, and a private balcony-perfect for those quiet morning coffees or evening wind-downs. The house is well-thought-out with practical features like a downstairs powder room, under-stair storage for extra space, and a separate laundry room, ensuring that the home remains organised and clutter-free. The air-conditioned living and dining area, along with a modern kitchen equipped with a dishwasher, electric cooking, and stone benchtops, are ideal for both everyday living and entertaining guests. The undercover alfresco with ceiling fan & outdoor power is accessible from the family room. Having all bedrooms upstairs along with a second living space ensures that the sleeping areas remain private and quiet, separated from the day-to-day activities and noise of the kitchen and living areas. The main bathroom is designed with family in mind, featuring both a separate bath and shower to accommodate different preferences and routines. For those with vehicles or in need of extra storage space, the double remote-controlled garage is a significant benefit, along with ceiling fans throughout the home to ensure comfort during warmer months. Security is also a priority, with screens and doors throughout, adding an extra layer of peace of mind for the residents. This home not only offers a luxurious and comfortable living environment but also places a strong emphasis on practicality and security, making it an ideal choice for families or anyone looking for a modern, convenient home in Newport.
