\$882,000

On entry, very generous living spaces, plenty of bedrooms, and a home office give great freedom inside the home. Six and a half acres of partly cleared land and bushland give peaceful serenity outside. This character cedar cottage-style home is a great size & offers an extraordinary opportunity to enter the lifestyle property market on acreage in a home of this size, in this price range. Yes, there is room to improve if you wish. True for almost all properties. This is a great floor plan for the family. The living spaces are at either end, the master bedroom suite and office join them downstairs, and all other bedrooms and a bathroom are upstairs. The home is discreet from the road and has enough cleared area for animals to welcome you home. If you are in the market for a rural retreat lifestyle property in the channel to fit the family this one is a very affordable option and a must see.
