Step straight into a residence that embraces family. The home was designed with a lifestyle of family fun and entertaining in mind. Polished floors flow through the open plan living room comprising two lounge areas, dining and of course the stunning kitchen. The kitchen would be a dream to work in with adequate storage, large bench space and European appliances including dishwasher. Large sliding doors lead to the patio extending the entertaining space of the home. Parents can prepare in the kitchen while watching the kiddies run around the expansive back garden. The current owners have created a concreted space for the basketball enthusiast tucked around the corner of the home and providing easy side access to the garden. The home is warmed by both a pellet fire, heatpump and wood heater in the garage. The entertaining space of this property has been extended by the activity space created in the super sized garage with rumpus area and loft storage. There is plenty of room to park the cars outside and even a separate driveway to park the boat and caravan. Sun streams into the parents retreat with doors opening to the garden. The jewel of this area is perhaps the large spa bath or the walk in wardrobe. The other 4 bedrooms are adequate in size, have built in robes and are served by a bathroom with bath. Not only does the home embrace family but so does the location. Walk or bus to nearby schools, shopping centres and the newly developed Kingston Park famous for its nature based play activities. Toddlers to teens can be occupied all day with swings, tracks, climbing equipment etc. Kingston is a fast growing family friendly area just 15 minutes drive to Hobart. It continues to grow in amenity with little need to venture out unless it is to nearby Mt Wellington or the exquisite Huon Valley for a weekend jaunt. - Striking looking home- All on one level- Polished floorboards and carpet- Family fun home
