When quality and location counts, this custom built, designer home will tick all the boxes. Designed to suit the site and maximise the aspect, the natural light, air flow and sense of space throughout is remarkable. The layout of this split level home creates multiple zones throughout, with formal and informal living areas, a private master suite, guest room and bedroom wing. The hub of the home is the open plan kitchen, complete with an oversized, stone topped island bench, loads of storage and modern appliances. The kitchen is central to the dining and lounge rooms and flows directly out to the North facing, covered outdoor entertaining area. Stunning hardwood floors throughout along with plantation shutters add a real warmth and feeling of luxury. Zoned, ducted air conditioning throughout along with an easy care, flat yard make living a breeze, leaving you more spare time to enjoy the finer things. Solar panels keep the energy bills down and being located in a popular, tightly held area, with all the amenities at your fingertips, ensure that owning a home of this calibre will be sure to make you the envy of your friends.
