**\$649,500**

In the West End of town, this quality built home with all of the extras from central heating to evaporated cooling has been cleverly designed with family in mind on a 700 plus allotment. A hotel style master suite, with its huge walk in robe, full ensuite and separate toilet, is set away from the other bedrooms and has direct access to the undercover alfresco area. The main bathroom allows direct access from both bedroom 2 and 3. In addition to the three bedrooms, you will find a study or bedroom 4. In addition there are 2 separate living areas. The home has been finished off with all the extras, from stone bench tops in the kitchen, a walk in pantry, extra-large laundry with walk-in store room, split system for cooling, a 3 kilowatt solar panel system, extra-large double garage under roof line with direct access to the home and well planned low maintenance gardens. With a home like this, all you have to do is drop your furniture and move straight in.
