Offers Over \$285,000.00

Step into this remarkable home that offers you plenty of space and modern living. This home welcomes you with a large entry hall that can offer versatility as a potential space for a pool table or expansive dining area. It includes 4 large bedrooms, a family bathroom, and a spacious master suite with a walk-in robe and an ensuite with double shower heads. The main living area is thoughtfully designed, featuring a stepped layout that encompasses a meals area and an extensive lounge, with sliding doors providing seamless access to the patio. A freshly painted kitchen offers plenty of space and convenience with modern appliances. The kitchen seamlessly expands to the laundry that provides access to the side yard. Outside, you are first welcomed with a low maintenance native garden. At the rear of the house, the entertainment area is a true highlight, designed to impress with views overlooking the lush back garden. To the side of the house, you can find back entrance to the double garage and to the built-in workshop featuring a convenient roller door. There are also 16 solar panels just installed last year and a rainwater tank, both added for extra energy and water efficiency.
