Introducing the Davenport: A cleverly designed two-bedroom and a downsizer's dream, with bedrooms separated from kitchen, dining, living and entertaining areas. Inspired, thoughtful and easy to maintain, the Davenport design offers space, storage, living and entertaining areas without the upkeep of a three-bedroom design. Entering from a covered patio or the secure single lock-up garage, this stunning home is consciously divided down the centre, with one half serving as a dedicated and quiet bedroom quarters, with two large bedrooms (the master featuring private ensuite) including built-in robes, divided by bathroom and laundry. The other half of the home is designed to integrate the large open-plan kitchen (including island bench) with the enormous kitchen and dining areas, ideal for family gatherings and entertaining with friends. An expansive living area opens onto the outdoor alfresco terrace, with large sliding doors for seamless indoor/outdoor entertaining.
