'Solitaire' comes to market not only as a most rare and remarkable parcel of Australian coastal land, but with plans and approval to create what could stand as a genuine architectural landmark. Spanning some 49 acres, with a picturesque natural creek and two waterfalls, this geographically blessed holding stretches across rolling pastures all the way down to the sand. This is a highly unique privilege along the shoreline at Flinders, where most of the notable estate are set high above the water. The offering has been further enhanced by the property's extraordinary design vision, three years in the making and fully sanctioned by council, which provides for a vast and beautiful private compound crafted and equipped in the true spirit of world class luxury escapism. Properties such as this come along very rarely. Full plans and high quality rendered imagery available upon request. Design by BayleyWard. Render by Pointilism Pty Ltd.
