Featuring the ultimate in high-quality finishes, this brand new three-bedroom executive townhouse has it all, balancing luxury, space and style in a smart low-maintenance design within walking distance of Westfield Doncaster, schools, city-bound buses and the Koonung Creek Trail. One of only six on a boutique block, the design behind this triumph of modern living is one of immense thought and consideration, with a beautifully-balanced light-filled interior, indoor-outdoor living, zoned accommodation and carefully selected durable materials that encourage a practical, effortless lifestyle for growing families. Oak timber floorboards contrast beautifully against the neutral colour scheme, while square-set high ceilings evoke an air of contemporary finesse and sophistication — particularly the captivating 3.7m vaulted ceiling with skylight upstairs that towers above the staircase, landing and luxurious main bathroom. Open-plan living is at the heart of this contemporary showpiece and excels with its impressive proportions, visual flow and direct access to the high-impact, low-maintenance backyard; a stunning quartz stone kitchen with Miele appliances including steam oven offers a five-star cooking experience. Three generous bedrooms (oversized main with ensuite) are zoned for privacy upstairs; this feature-packed home also boasts ducted climate control, private pedestrian street access and side-by-side basement parking with secure lift access into the home.
