\$775,000

An appealing smart and functional home of generous proportions. This home must have been crafted for a special client or built by a builder for themselves. A lot of thought has been put in here. It's a comfortable split-level home with raked ceilings in the large second living space that is easy access for indoor/outdoor living, then, up just a few steps to the kitchen, dining and lounge. The kitchen is a good size with a big pantry. The home has all year-round comfort with a reverse cycle heater/cooler, 18 solar panels and a wood fire. All gardens are very well managed. Electric gates complete the enclosed rear yard with a 6 x 6 meter garage with auto doors. This is truly a property with a point of difference.
