\$850,000

Built with a single level on a 558sqm block. This house is not to be missed. Under the concrete tiled roof is the 2.7m high ceiling, beautiful 4 bedrooms, generous double garage, sleek kitchen and tiled open living and media space. With plenty of sunlight and the LED downlights throughout the house, the house glows morning and night. Each of the bedrooms are generous in size, and all come with built-in robes and ceiling fan. The Master bedroom has the sweet extra luxury of a sleek ensuite and a walk-in robe. The carefully designed kitchen made cleaning a breeze featuring black stone bench top and electric ceramic cooktop which brings out the high-end stainless-steel appliances, and open-air pantry. The split island leads to the open living and media areas easily transforming the quiet living space to a casual party scene. Stepping out from the living area, the covered alfresco and the open but fenced private yard is an ideal place to host a BBQ with friends and the open yard brings great opportunities to turn the possibilities into reality, be it a tranquil garden or a trampoline with laughter. With the Queensland summer in mind, flyscreens to all front façade opening window sashes and keyed window locks to all opening sashes and sliding doors allows the cooler air to flow through. Let's not forget that the Tesla Charging Pole is ready for the styled drivers to be always ready in the Double Garage.
