This property now has approval for a 3 Lot subdivision, providing some very attractive options. Fronting both Logan and Bulwer Streets, the western two thirds of the property has security fencing with drive-through access with a number of buildings. The eastern end of the property is vacant land with good access to Bulwer street and approval to be subdivided into 2 residential blocks. Our vendors have done the hard work to allow this property to be developed and the options are now available for its new owner.
