Combining compositional rigour with modern design elements, this large four-bedroom family home delivers an abundance of light across two spacious levels. A premium material palette consisting of plush carpeting, premium timber, stone finishes, and floor-to-ceiling tiling add textures that are simultaneously refined, luxurious, and delicate. The property makes a virtue of geometric precision. This impulse is eloquently expressed across its stone waterfall benches, bathroom tiling, and garden landscaping; and more conceptually by its two-tiered blueprint. First among its peers, this property comprises four lavish master suites - two with BIR, two with WIR - prioritising families with a thoughtful & luxurious layout. A ground floor powder room accommodates guests. Floor plan features include a gourmet kitchen with scullery, north-facing living & dining domain, entry study, skylit first floor lounge, and internal access garage. Sitting on the cusp of Cheltenham's lifestyle & entertainment district, live within walking distance of Cheltenham station village, Southland SC, Cheltenham Park Reserve, and local schools.
