\$200,000

This beautiful 689m² block certainly packs a punch. Build your dream 2 story home with verandahs all around and then sit back and enjoy the almost 360 degree views looking out east across to Fraser Island, west to look over the Susan and Mary river systems, north to look out over farmland and South to look up toward the River Heads headland with Fraser Island in the back drop. Sitting on top of the hill you will get the lovely sea breezes that Hervey Bay regularly has to offer. There is electricity already connected with a power box on site and a driveway installed. Owners have already done the soil testing and septic plans already have house plans ready saving a potential buyer time and thousands of dollars. Be quick on this one as it is priced to sell, so it won't last long!!!
