\$470,000

This home is an eclectic mix of classic timber floors, mostly neutral colour scheme and pops of original character here and there. There is a cosy lounge room off the very cute kitchen with pantry and adjoining dining space. You will appreciate the second large living area at the rear of the home plus a sunroom at the front that could be used for a variety of purposes including a home office space or an extra sitting room. There are three big bedrooms, two with nice, high ceilings that create a nice sense of space, one featuring lovely VJ panelling and built-in robe and the second with built-in shelving for storage. The third is tucked away at the side of the home and is big enough for a kid to spread out in great comfort. Add to the features a woodfire with a mantle piece plus split systems throughout the house to help with year-round climate control. There is a bathroom with a bath and toilet plus there is a shower and toilet in the laundry. The backyard has a double shed and loads of space for kids and pets to roam, utilise the covered patio for outdoor living space and you could easily establish a fire pit area and add gardens for a little oasis all your own. In a great location in a thriving country town, this home can be added to your list, whether as a home to live in or an investment.
