The impressive, inviting spaces of this stylish townhouse would deliver exceptional appeal wherever they were - in this setting, directly opposite Hansen Reserve their attraction ascends to a whole new level! Outlooks through the trees to the parkland expanses beyond provides visual beauty that complements the vibrancy of a design that commences with a main bedroom suite enjoying a ground floor zone if its own. Above, living and dining areas that each open to welcoming balcony dimensions are arranged around a sophisticated central open-plan kitchen equipped with stone surfaces, a meals island, integrated cabinetry - the quality is beautifully clear. Two further bedrooms and a second bathroom define the top floor of a format that's impeccably appointed and further enhanced by efficient split system heating/cooling. The convenience of two car garaging adds an ideal conclusion to an address that puts cafes, Corpus Christi School and shops within easy reach - and the reserve's recreational spaces quite literally across your street!
