A serene retreat presented in pristine condition, this inviting blend of high-end finishes and accomplished sophisticated interior is designed to impress and inspire. The eye-catching facade provides a stunning introduction to the home with a clear focus on quality which is instantly apparent. Defined by its abundant natural light the design brings together exceptional features with its effortless modern design that remains warm and inviting. Secluded from the children's bedrooms you are greeted by the generous master suite with robes and luxurious earth-toned ensuite with oversized walk-in shower. The 3 remaining bedrooms flank the children's retreat with its study nook for either scholarly pursuits or as a home office base. Benefiting you with the luxury of ample space to unwind and relax through multiple living areas, the intelligently zoned floor plan caters to the needs of all modern families. As functional as it is aesthetically pleasing, the designer kitchen is bolstered by Stone waterfall bench tops, plumbing for family sized fridge, walk in pantry, quality appliances including double drawer dishwasher and pyrolytic 900mm cooker. There is a lovely connection with the outdoors via stacker doors to the first entertaining area. An alfresco under the roof line and additional 2nd entertainment zone means family gatherings are well catered to. A long list of lifestyle inclusions have been carefully curated by way of extensive use of hardwood oak flooring, plush carpets, double glazed windows, streamlined square set plaster, raised ceiling heights & on trend matt black fixtures. There is also ducted heating plus reverse cycle air conditioning. Vehicle and car accommodation are truly impressive with an over-height double car garage & internal access into the home. The fully concreted size driveway, which can hold 6 + vehicles leads you to a 7.6 x 6m (approx.) custom shed with internet connectivity plus a wash bay for cars/trailers/boats etc. All of the hard work that goes into building & establishing a new home has been done for you here, including low maintenance landscaping. Meeting all the requirements of modern life, this home does not compromise on quality, it really is the kind of home that can wrap itself around the family one moment and throw itself open to entertain friends the next.
