\$500,000

Handcrafted and architecturally designed, this outstanding home has a uniqueness and feeling that hits you the moment you enter. A home with an unmatched energy, created with a vision and desire to blend the home into its natural landscape, the mud brick home is not only encased in an array of established trees and gardens, it is surrounded by orange orchards and only a minutes drive to the Murray River. There are features galore including a beautiful stonemason built open fireplace, that is the focal piece of the main living area and kitchen, that also boasts brick floor tiles, large timber beams, cathedral ceilings and feature windows spilling natural light in to the home. For a touch of history the kitchen wall is clad with timber salvaged from a paddle steamer that cruised the Murray in our early days. Sitting on a magnificent acre this family home is truly individual and authentic and offers a wonderful lifestyle in our region. Original leadlight windows, high ceilings, natural light while boasting multiple living areas and large bedrooms, an inspection will have you wanting to move in that very day. A large shed and certain creature comforts that make this rural lifestyle so perfect for you.!
