This is a great opportunity to secure a versatile property with flexibility that is rare to find. A classic character cottage that's been added to and extended to create a working hub that has suited the environmental company perfectly for the last 15/20 years. A blank canvas that can easily be used as is and move your business straight in. With minimal changes this could potentially be a fantastic home and potentially mixed use of home office to go with it. The large internal footprint could also be an ideal opportunity to create a spacious home with a potential warehouse feel or whatever you would like to make it. A property with many potentials that needs to be viewed and an open mind could take it anywhere. Located just around the corner from North Fremantle Hipster village with cafes, wine bars and lots of fun to be had in the tight knit local community. All just a short stroll to fabulous river side parks and walks or head to the pristine beaches of Leighton and Port. Call Nathan for further details.
