Buyers From \$1,230,000

The owners have designed this property as a tribute to their African heritage, offering the experience of a permanent African safari within the modern estate of Jimboomba Woods. You'll first notice the minimalist front yard and a contemporary home crafted by Gallery Homes. Inside, the African theme seamlessly integrates with the modern floorplan, featuring a kids' retreat and 3 bedrooms situated at the front of the home. As you move down the hallway, a large open-plan living/dining area greets you, which overlooks the backyard. The generously sized master bedroom provides direct access to the outdoor space as well. Stepping onto the patio transports you to Africa, where a large gazebo area includes an imported BBQ/smoker from South Africa. This space is perfect for relaxing with a drink while enjoying the afternoon sunset. The firepit is truly unique, comfortably accommodating over 30 people. Imagine lighting the fire and sitting with friends and family, enjoying laughter and the crackling sounds of the fire. Additionally, the property features a plunge pool, perfect for soaking in the sunsets and admiring the stunning yard. There is also a 6x9 shed with its own solar power and a separate container studio room. The owners have created an inviting and relaxing outdoor space with a significant wow factor. This is a magical property located in a highly sought-after estate.
