\$350 per week

This studio has been totally transformed inside, it has 1 bedroom, separate living space and small kitchenette/dining area. Separate toilet away from shower room. Split system heating and cooling. The finishing touches are just been made and then it will be ready to go. Water is included but you will need to arrange your own electricity connection. There is no separate internet connection so you would need to run of your own portable internet device. The added Bonus is no gardening required for this property, very low maintenance! This is a stand alone studio, 1 of 4 on the property with a main house also located onsite, you have one car park included; please note: carpark is not situated right beside your studio, it is a short distance away. There is an exclusive laundry to use in a separate outbuilding, next door to your studio.
