The proximity of the property allows for easy access to all the amenities of the nearby towns. The block is fenced into two paddocks which are used to rotate the cattle as needed. This setup provides flexibility for managing the herd. Water is collected from the shed roof and piped underground to the nearby large tank. Additionally there is the option to pump water directly from the creek if needed, ensuring a reliable water source for the property. An open shed provides shelter for the farm machinery. In the sale included is a tractor, spray unit, cattle yards and a pump to pump from the creek. The property can also be described as an optional lifestyle property with plenty of room to build a house with council consent.
