Quality soils throughout the aggregation, originally timbered by salmon gum, mallee, gimlet, york gum and jam. High yielding capacity. Full complement of building around the property including shearing sheds, fertilizer sheds, and general purpose sheds, numerous silos. Scheme and dam water throughout. Suitable for a large cropping programme and livestock enterprise. Ideal carbon sequestration and renewable energy opportunity. The Moorine Rock / Bullfinch aggregation is a large scale operation and would suit an extended family or corporate investor.
