Views to the North

Boasting character on entrance with established gardens, this single level brick home has been designed and built by Don Errington and offers raked- cathedral ceilings, internal brick walls with cosy fireplace, multiple a/c units throughout, two living rooms, dining, four bedrooms and two bathrooms with a spacious family kitchen and beautiful North facing views from the back patio.

Designed for family living, the living area is located to one end of the house and bedrooms to the other. Each of the include built-in storage, reverse cycle a/c units, electric ceiling fans, carpet and master bedroom with ensuite and walk-in robe.

The main bathroom has a free-standing shower, vanity, bath separate toilet room and separate laundry with access to the exterior.

The beautiful timber feature beams of the raked ceilings open the room for grand living and flow through to the fully equipped kitchen and second media/rumpus room.

With a wall oven, ceramic cooktop, breakfast bar and large windows to enjoy the view, the kitchen offers ample storage cabinets plus room for the double fridge and freezer.

Privately set outdoors, the gardens have been renewed with flowers, mulch and various low maintenance plants. From the back undercover patio, your gaze will draw to the beautiful scenic view.
