\$795,000

This unique home in Peterborough along the Great Ocean Road offers unlimited opportunities. With the property market in Peterborough tightly held, properties such as this are few and far between. Offering exceptional views to the north overlooking the Curdies River estuary this cleverly designed home takes advantage of all its natural surroundings and offers exceptional quality both inside and out. The main part of the home features 3 bedrooms all with built in robes, a main bathroom and external shower ideal after a long day at the beach. The large open plan living opens up to the north and south sides of the home, a beautifully appointed open plan kitchen/dining area is designed in a way that allows you to enjoy the beautiful river views in the distance. One of the other stand out features in the home is the large self-contained studio apartment at the rear of the property. Access to the studio is either via the garage or from the main decking area and would be ideally suited for an extra source of income through holiday rental but would also be a great asset for a teenager or parent retreat. Just a short stroll to the swimming /surf beaches, local cafés and golf course this home is not only unique in its design but equally unique in the unlimited potential it offers.
