This stunning architecturally designed home is but steps to the vibrant life of Mission Village with its bars, shops and restaurants and the pristine sands of Mission Beach. Built in 2020, this ultra modern home wants for nothing. Boasting a split level design the upper level consists of the master retreat with its own balcony providing views to the beach and allowing sea breezes to waft through. A fabulous black and white bathroom and wall of wardrobes provide the utilities. The ground level comprises another two large bedrooms each with good size wardrobes and separated by a family bathroom and separate toilet. A gourmet kitchen with top of the line appliances features a dine-on island bench that overlooks the open plan living and dining area. The indoors then open out to a very private, covered entertaining patio complete with outdoor kitchen and, of course, you have a sparkling inground pool to complete the picture. Direct undercover entry into the home is provided from the convenient front carport and a well appointed laundry room is located just inside the entry. To the rear of the property sits an enormous two bay Colorbond shed which will accommodate caravan, boat, trailer and/or extra vehicles with ease plus a separate workshop with convenient WC. All this is set in low maintenance landscaped grounds serviced by a bore and pump. And just for good measure you get a 6.6kw solar system and a wired in 7.5ka Scorpion generator thrown in. Naturally the owners are looking for caring tenants who will truly appreciate the quality on offer. Call today to arrange your private inspection. **DISCLAIMER:** While the property is offered furnished not all the items pictured will be included.
