Offers Over \$495,000

MoDa Real Estate is proud to present to the market this piece of Innisfail's History. A property that has never been offered to the market in its lifetime of over 80 years. Nestled only a short meander from the township of Innisfail, this double brick residence has been fondly admired by locals for decades. The home epitomizes timeless elegance and charm. A home that I can safely challenge as a true 'one off' and 'bespoke' residence. This is a true testament to superior craftsmanship and sophisticated design - it is a unique masterpiece! Held by the same family for its entire life and built by their very own master builder who also contributed to the build of the local Court house. The home has many original features along with some updates which have been painstakingly recreated to mimic the original design and build like the roof tiles (new iron) & plaster mouldings, original polished hardwood floors, soaring ceilings, exquisite plaster finishes and curved original timber cabinetry exuding refinement and delving you back into history. 3 bedrooms or 2 and a reception area complete the sleeping quarters. The lounge and dining area are surrounded by casement windows with river views and an updated bathroom and large laundry room is complete with the original copper and chimney. The zoning is residential choice so further residences could be added (stca) or an extension could be added with the new owners stamp, this property has piqued the curiosity for many years and the opportunity to now be the new custodians is now available, don't miss your chance to view this before it's gone!
