\$95,000

Are you up for a renovation challenge? Then this could be the property for you. This weather board cottage features 2 bedrooms, lounge, kitchen area (need a complete reno), large bathroom with a shower, toilet and vanity. Outside there is pergola with a shade cloth roof, a storage shed and a rain water tank. There is also a 21 panel solar system and a heat pump hot water. The power and the water are still connected but we don't know what works and what doesn't. The solar inverter says that there is a fault in the system. I strongly recommend a personal inspection before you make an offer. Everything seen in the photos and the video will be in the property at settlement.
