Rewarding From A Range Of Angles

Its family credentials are clearly established by this four bedroom, two bathroom home's current day floor-plan while its substantial allotment invites consideration of dream new home construction or exploration of multi dwelling development possibilities, STCA. All the prospects and potential that accompany this address are complemented by its quiet yet convenient location within walking distance of North Williamstown station, local shops, cafes and Williamstown Beach. While the future options are pondered and pursued, the current day proportions provide a flexible formal lounge with an open fireplace and a spacious separate living/dining domain featuring an open-plan kitchen and aspects over private under-cover alfresco proportions. The main bedroom's bay window, walk-in robe and ensuite, three further bedrooms, a central bathroom and separate laundry conclude an inside story that's defined by complete liveability. The garden surroundings serve to highlight the sense of scope, including the significant asset of a secure double garage accessed by a wide rear ROW. A residence that's rewarding for so many reasons.
