Cove House: Brilliant design for a modern lifestyle

You'll know you've landed someplace special the moment you step over the threshold. Architecturally designed by Markham|Lee in 2017, this residence is simply spectacular, fusing a refined palette of natural materials with an unfaltering attention to detail; the brilliantly considered spatial design embodies the boldness and pure excitement of the modernist aesthetic. Premium-grade finishes and extensive glazing frame a collection of alfresco courtyards and pool, while the nearly six-metre ceiling in the lounge affords privacy and greenery from every viewpoint.

Streamlined and sophisticated, the interiors are custom-designed for comfort and functionality with a well-integrated layout anchored by a sleek, stone-finished kitchen and butler's pantry. Accommodation is equally impressive with sliding barn doors fronting each of the king-sized bedrooms, a superb master suite joined by a home office and absolutely gorgeous bathrooms.

A secondary dwelling is privately tucked away from the main residence; it's a fully self-contained loft studio that's DA approved as a seasonal or fulltime rental; it's also a great option for extended family or guests over the holidays. Signature features include ducted climate control, Sonos sound system, wood fireplace, hydronically heated floors, external shutters, video security, irrigated gardens and garage with internal access. Elegant in its proportions and beautifully crafted, it's a striking and sustainable home – perfect as a fulltime residence or an extraordinary holiday retreat.

- Bold, organic forms joined with a sleek modern aesthetic
