## **Hidden Haven surrounded By Nature And The Sound Of Silence.**

A unique one of a kind location to make your new life, weekend retreat, secret crabbing get away or place to write that novel.

In a secluded location, at the end of its own road and surrounded by beautiful bush there are no neighbours to be seen and no traffic to be heard.

This location is a once in a blue moon opportunity. A feeling of being isolated from the rest of the world where all you can hear is nature.

Backing on to the bay, a pair of gum boots will serve you well with a short walk through the mangroves leading you to what has historically been a great, secluded crabbing spot.

To one side is Tim Shea's Wetland Reserve with a walkway through to the other end of Charles Terrace.

The cabin needs some love after years of being tenanted, but a little can go a long way. Originally used as a weekender by the owners, they've moved on and need to exit the property and let someone else make it theirs.

Small but perfectly formed the property has a front and rear deck area. these are accessed by double french doors leading from both bedrooms and the kitchen door located at the rear of the home.

Open living, dining and kitchen area set the mood with an old world style brick fireplace. The bathroom opens to the living room. and is conveniently placed close to the bedrooms.

The style and decor lend an eclectic feel to the property. The shed is a welcome addition at the side of the home for storage for all those extra items. Set on a fully fenced 751m2 site, this property is surrounded by natural conservation bush land.
