Remarkable 39 acres and privacy assured

If you were ever waiting for the perfect parcel of land with an abundance of opportunities to build your own home and run a business, then do I have a treat for you.

Located in the historical township of Geeveston, your 39 acre block of land is fully wallaby proofed fenced and has been maintained organically.

The soil on the land has a very high organic matter and the long rotation grazing system the owner has used, has been designed to put carbon into the soil. There are two dams on the property with a wonderful creek that runs along the bottom boundary.

Other highlights of the property include a hard base driveway, 2 x sheds, no close neighbours and plenty of ideal building envelopes. Substantial parcels of land where you have prime fertile pasture and water on the property are extremely rare and sealed road frontage to essentially the entrance is another major positive.

What are you waiting for? The time is now, phone me today to learn more about this majestic land holding.
