## **GREAT BUILDING BLOCK**

This residential zoned building block would be a fantastic spot to build your new home STCA. The property has a 18.5m frontage and a depth 48.8m ( all measurements are approx). Many years ago there was a house on the block so water and sewerage connections are on the property but they were from sometime ago. There is also what's left of a concrete drive and there is already 2 loads of dirt fill generously donated by some unknown person. The property is about 2 blocks from the main street and has a cross over on the right hand side of the property.
